

This 'foobar' folder should contain a few files that you get when purchasing the FooBar control from CodeCanyon.net

<http://codecanyon.net/item/foobar-a-jquery-notification-bar/241318>

In the folder here named 'foobar', place all the files from the folder with the same name that you downloaded. It will resemble the following:

 images	3/12/2013 6:50 PM	File folder	
 jquery.foobar.2.1.css	2/23/2012 6:38 PM	CSS File	8 KB
 jquery.foobar.2.1.js	2/12/2012 6:46 PM	JS File	68 KB
 jquery.foobar.2.1.min.js	2/23/2012 6:56 PM	JS File	31 KB

If you are concerned for space you can delete the larger jquery.foobar.2.1.js file as it will not be used. The .css file, min.js file and images folders are critical though.
